## EXPERIENCE

### BDPS Computer Education

APRIL 2023 - JUNE 2023

Internship program in python

## EDUCATION

### Z p p high school, KAKINADA — SSC

JUNE 2014 - APRIL 2015

Board of secondary education

### RRBHR junior college, PITHAPURAM

JUNE 2019 - APRIL 2020

Board of intermediate education

### Rajiv Gandhi degree college, sarpavaram

JUNE 2020 - APRIL 2023

## PROJECT

### TIMEZONE CONVERTER USING PYTHON

The "Timezone Converter" project aims to develop a Python program using the Date and Time module to convert date and time values between different time zones. By leveraging the date, time and pytz libraries, the program allows users to input a specific date and time in one time zone and obtain the corresponding date and time in another time zone. This project provides a flexible and efficient way to handle time zone conversions, enabling users to work with timestamps across different geographical regions. Through this implementation, users can easily incorporate time zone conversion functionality into their Python applications or scripts.
